Heavy Clay UK 2024

Join us for the first Heavy Clay UK event hosted by the HCTa in conjunction with the Institute of Quarrying.

With the fast-changing demands on the sector including advances in technology and the decarbonisation agenda, the event will look at the solutions being developed to support these key issues.

With an exhibitor showcase and a keynote presentation during the day, delegates will gain valuable insight into the advances the industry is making and have the chance to network with suppliers and colleagues.

The event will also include the presentation of the awards, sponsored by the HCTa and ICT Education & Training Trust:

- **Student Awards for Clay Qualifications**
- **Keith Morton Award**
- **Ernest Simpson Award**

Delegate bookings will open in September.
